

HOOK WITH OR WITHOUT TAB

Durability and practicality.

Hook for hail protection systems with elastic cords. A quick and secure connecting element that allows the net to be mounted and removed rapidly, while absorbing stress in case of hail or wind.

Available in versions **WITH** or **WITHOUT HOOK**.

With hook (spring closure), it is safer as it prevents the carabiner from opening accidentally.

Without hook (open), it is faster to attach but less secure under stress.

TECHNICAL INFORMATION

Type of material: PA (Polyamide)			
MECHANIC FEATURES	UNIT	VALUES	METHOD
TENSILE MODULUS (E)	Mpa	>2500	ISO 178/93
TENSILE YIELD STRENGTH	N/mm2	>80	ISO 527/93
ELONGATION AT BREAK	%	>60	ISO 527/93
