

PLASTIC WIRE

Quality and innovation.

The plastic wire, replacing metal cable for supporting hail protection nets, protects them thanks to its smooth surface and low thermal conductivity, strengthens the system by absorbing external forces, and also saves valuable time by avoiding periodic re-tensioning.

TECHNICAL INFORMATION:

Diameter	Additives	Breaking force	Lenght
4,8	UV, heat and weather conditions stabilizer	858 daN*	49 m/kg
5,2	UV, heat and weather conditions stabilizer	1100 daN*	41 m/kg

* 1daN = ca. 1 kg; The data above have been approximated based on non-climatized tests. A deviation of +/- 10% is allowed

Available diameters: $\varnothing$ 4,8 – 5 – 5,2 mm / Available colors: black and grey

PACKAGING:

according to the $\varnothing$
