

V7 BIMATERIAL PLAQUETTE

Innovation and strength. The FIRST Italian clip that combines in a single co-molded body the benefits of a rigid and durable material (polypropylene) with those of a soft and protective one (rubber), making it ideal for films and nets.

Installation is quick thanks to the dedicated screw with a hi-lo thread designed for plastic materials. Available in versions with a **HOOK or HOLE**.

Compared to the V5, the V7 has larger dimensions. **Fastening with a single screw.**

TECHNICAL INFORMATION

Material: Outer side made of solid polypropylene (PP)
Inner side made of soft, high-grip rubber (TPE-S)
Plaque length: 121 mm / Thickness: 64 mm

POLYPROPYLENE			
MECHANICAL FEATURES	UNIT	VALUES	METHOD MEASUR.
FLEXURAL MODULUS	MPa	1200	ISO 178
TENSILE STRESS AT YIELD	MPa	24	ISO 527-2
IZOD IMPACT STRENGTH	KJ/m2	9	ISO 180

PACKAGING:

Bag: 200 pcs.

Box: 800 pcs.

Pallet: 16.000/19.200 pcs.
